

How to play iTunes music on Zune

If you have moved from Apple's iPod to Microsoft's Zune, you probably have some songs that you purchased from the iTunes Music Store that you would like to move to the new device.

Putting iTunes music on a Zune is both time consuming and tricky. The easiest way to make them available to your Zune is to burn the songs onto an audio CD using iTunes and then ripping the CD using the Zune software.

1. Create a new playlist in iTunes.
2. Add the protected songs to your playlist until you have 72 minutes of music.
3. Click Edit and select Preferences.
4. Select the Advanced tab.
5. Click the radio button next to Audio CD on the Burning tab.
6. Click the Burn Disc button.
7. Upon completion of burning the disc, rip the songs to MP3 using Windows Media Player.
8. Open the Zune software and sync the newly created MP3 files to your Zune device.
