Purchase NoteBurner Spotify Music Converter

Quick Link: To buy a license key for NoteBurner Spotify Music Converter, click [Here](#).

1. Why should I buy NoteBurner Spotify Music Converter?

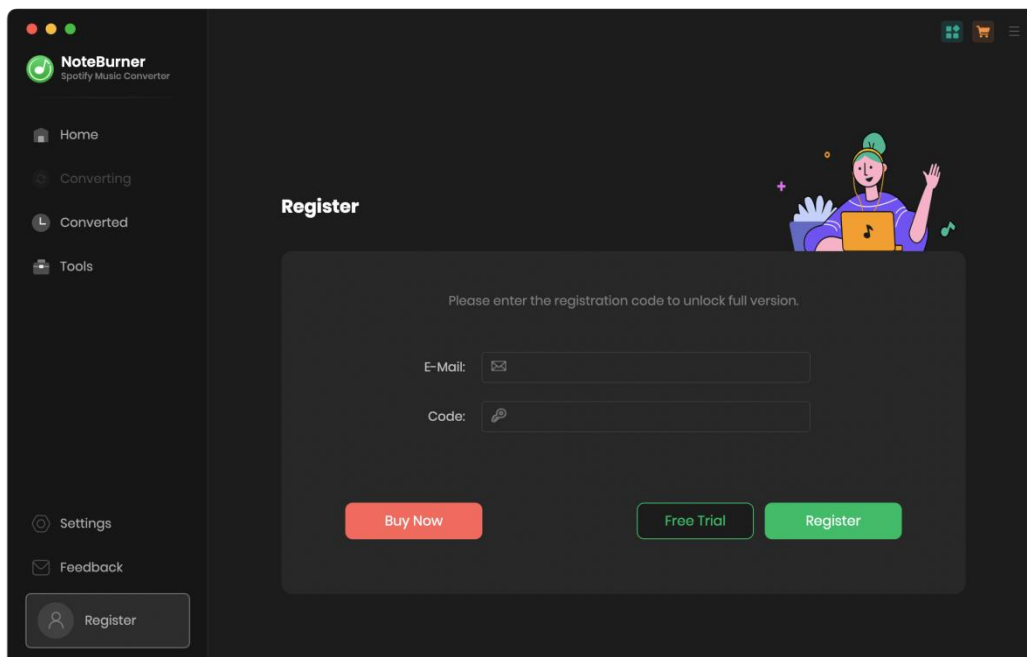

NoteBurner Spotify Music Converter is the shareware, and the trial version has the limitation that you can only convert the first 1 minute of each audio. After you purchase our product, you will be provided with a registration code which will unlock the full version.

2. What benefits do we have after registration?

- Convert Spotify songs without time limitation.
- Enjoy FREE technical supports.

Register NoteBurner Spotify Music Converter

Step 1: Launch NoteBurner Spotify Music Converter. Click the "Register" icon on the bottom left corner and you will see the registration window as below.

NoteBurner Spotify Music Converter for Mac Tutorial

Step 2: Please fill the popup dialog with Email and registration code. The registration code is case sensitive, so please do not add blank at the beginning or the end of the word. You can also copy and paste the Registration information via Command + C and Command + V into the registration popup dialog.

Step 3: After finished the registration step, the limitation of the trial version will be removed.

Notice:

1. Make sure both the Email address and registration code are provided by our company after you pay the registration fee. If you have not paid, please click Purchase to buy online.
2. Please make sure the Email address and registration code you entered are complete and correct.

Installation

To install this product, please do as the following steps:

1. Download the installation package for NoteBurner Spotify Music Converter from [Download page](#).
2. Double click the installation file to start installing the program on your computer. Then simply drag the NoteBurner Spotify Music Converter application's icon to your Applications folder.
3. Follow the instructions to finish the installation.

Main Interface

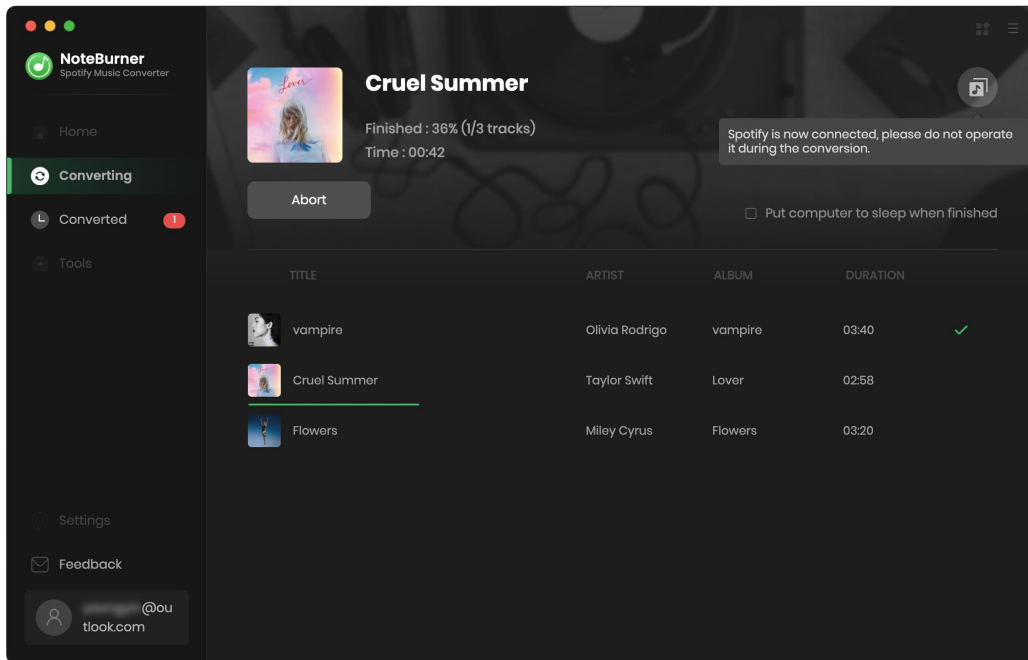

Launch NoteBurner Spotify Music Converter on Mac. You will see the simple interface of Spotify Music Converter.

Converting Interface

After clicking the Convert button, you will see the converting interface like this:

Menu

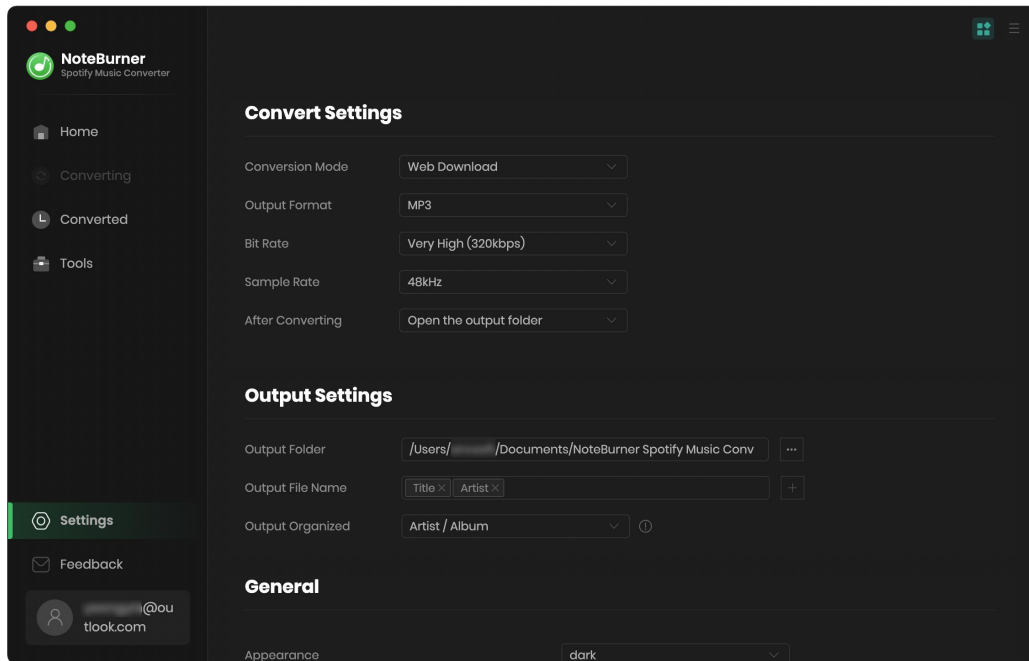

When clicking the menu bar at the upper right corner, you will see the menu list like this:

Settings

Click the “Settings” button at the bottom left corner, and you will see a pop-up window as below, where you can customize output format, output quality, output path and so on:

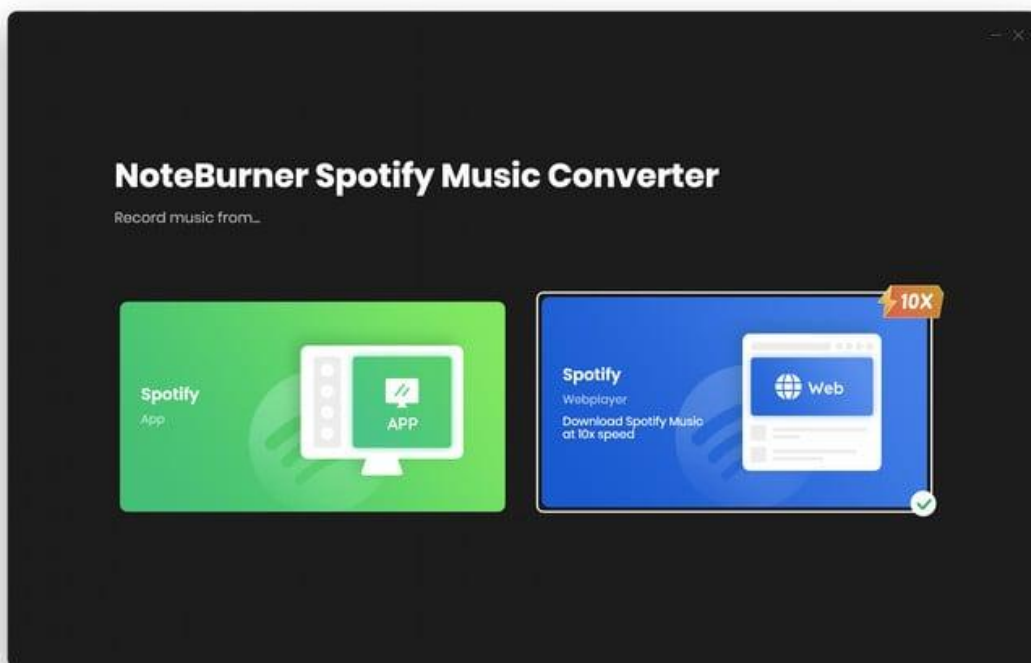

Tutorials

- Choose Conversion Mode
- Import Audio Files
- Choose Output Settings
- Customize Output Path
- Convert Audio Files
- Check History Records
- Edit ID3 Tags
- Convert Local Audio
- [Convert AA/AAX Audiobook](#)

Choose Conversion Mode

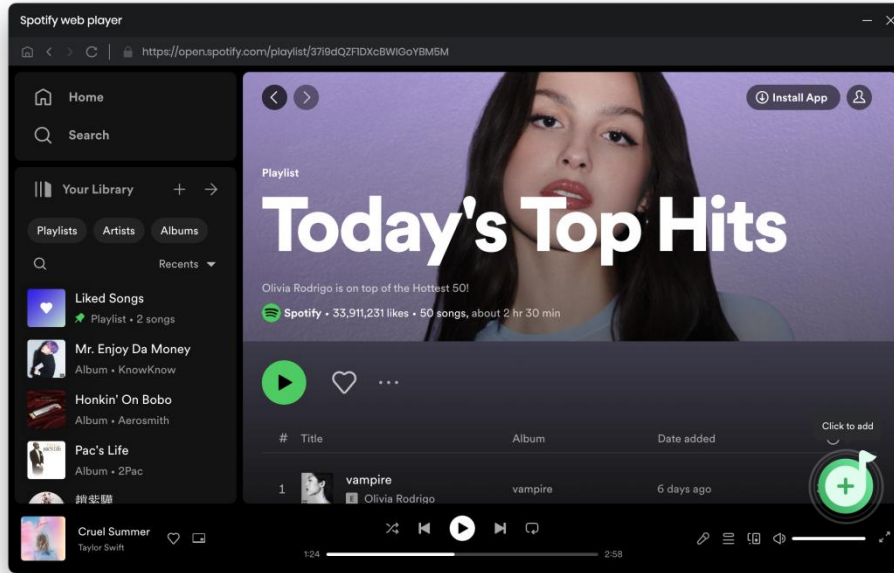

Launch NoteBurner Spotify Music Converter on Mac, then choose to convert songs from the Spotify web player, which you can download Spotify songs at up to 10X speed.

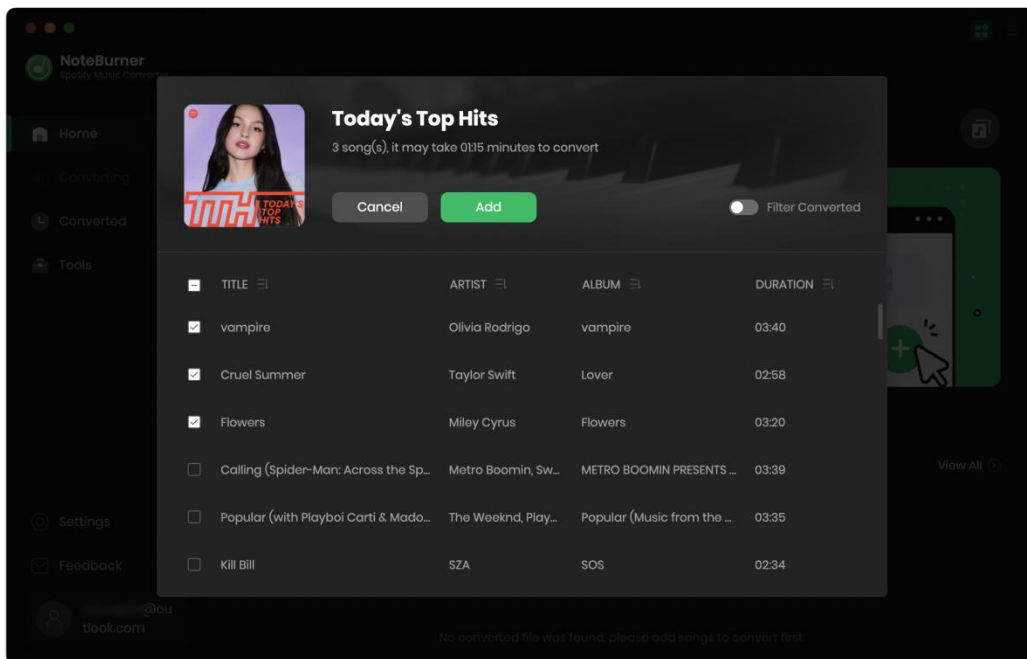

Import Audio Files

Find out a playlist on the Spotify web player window, then click the "Add" icon at the bottom right corner.

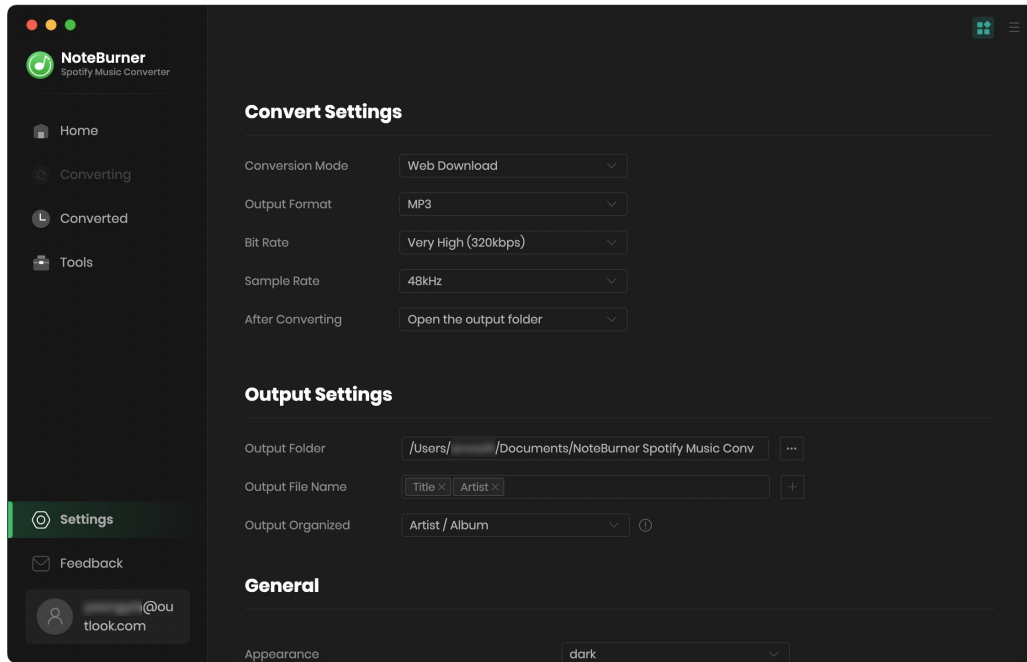

Choose the Spotify music tracks from the list, then click the "Add" icon.

Choose Output Settings

Click the “Settings” button on the bottom left, where you can choose to convert your Spotify songs to diversified output formats, including MP3, AAC, WAV, AIFF, FLAC, or ALAC. Besides, you can adjust the output quality – Very High (320 kbps), High (256 kbps), Medium (192kbps), and Low (128 kbps) and so on.

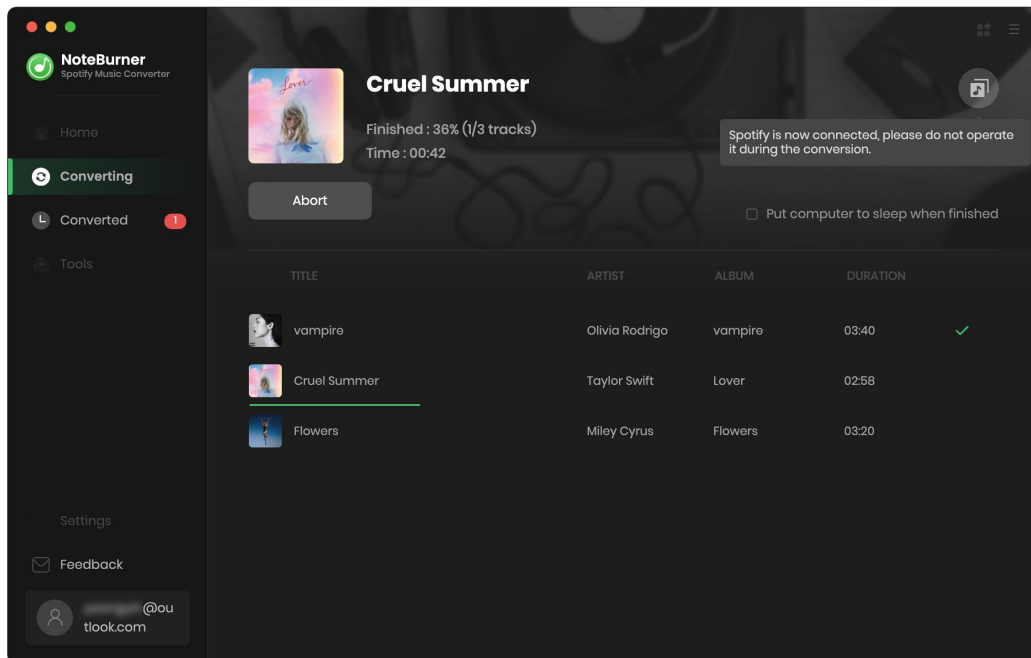

Customize Output Path

Click the “Settings” button on the bottom left. Here you can also customize the output directory and output file name for the target converted Spotify songs. Also, you can select to keep the converted files organized by Artist, Album, Artist/ Album, Album/ Artist, or none.

Convert Audio Files

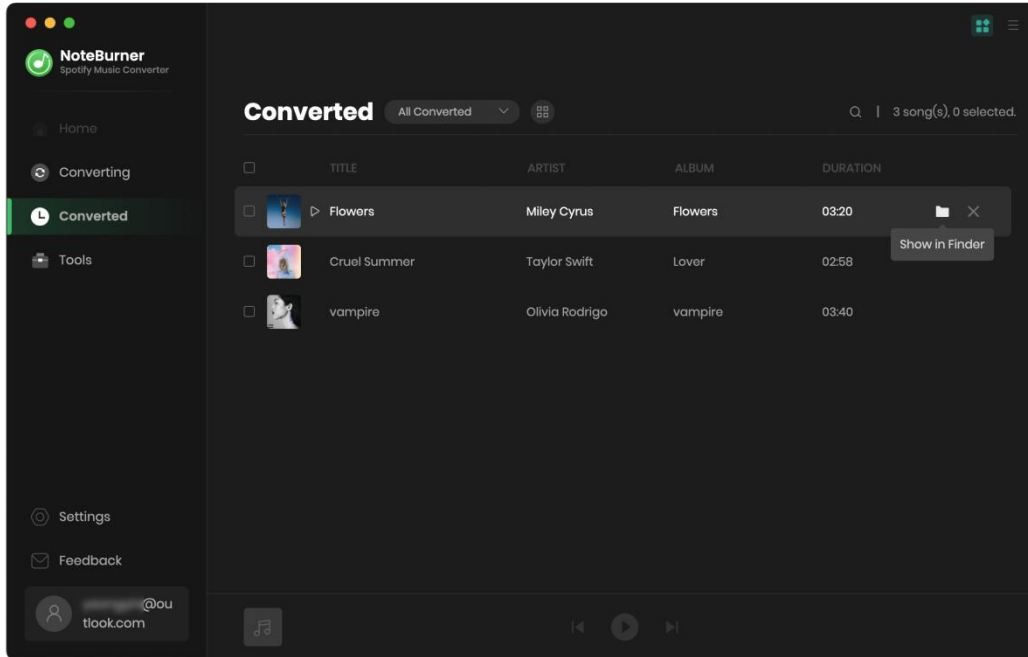

After adding the Spotify audio files and customizing output settings, just click the Convert button to start the conversion.

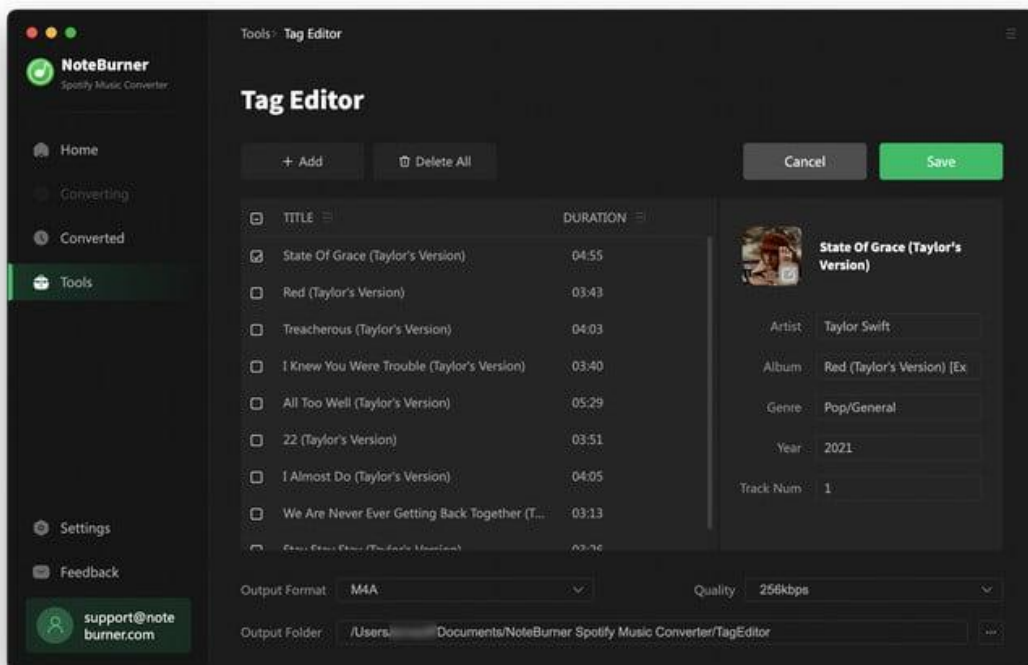

Check History Records

When the conversion is completed, the history will be saved automatically. Click the “Converted” button on the left side and then you will see all the songs that have been converted successfully.

Edit ID3 Tags

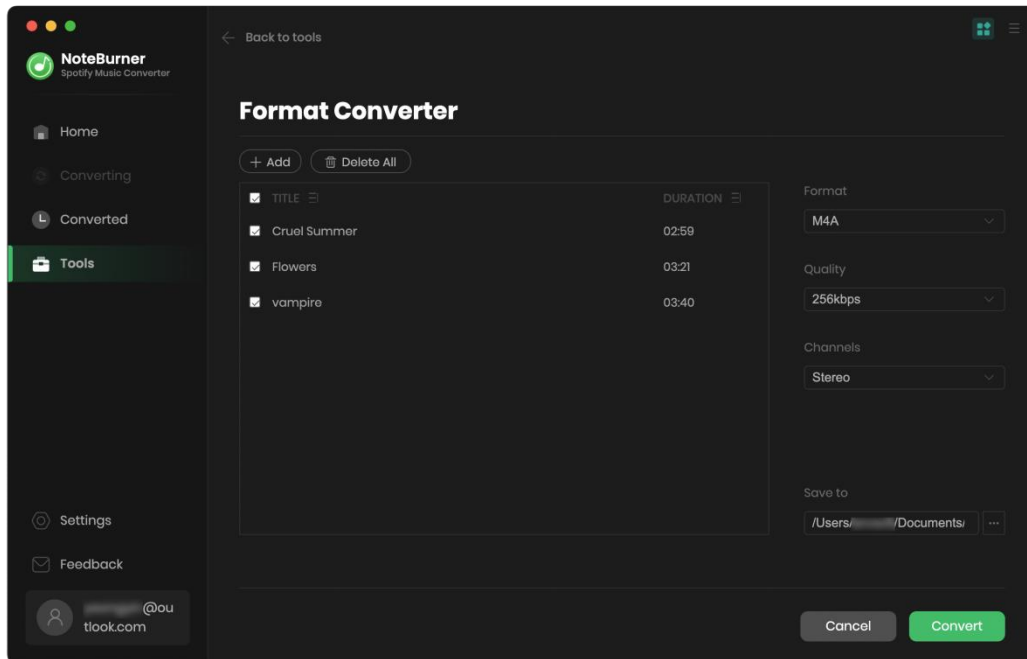

The program retains the original quality of Spotify music and keeps all ID3 tags after conversion. And you can also edit all the important and useful Meta information by clicking "Tools >> Edit Tag".

Convert Local Audio

Apart from Spotify music, NoteBurner Spotify Music Converter also supports to convert the normal music to MP3/M4A/AAC/WAV/OGG/AIFF format. Simply open NoteBurner, click "Tools >> Format Converter", and then add the music from your computer to convert.

Convert AA/AAX Audiobook

NoteBurner also supports to convert the local aa/aax audiobook files to M4A/M4B/MP3 format. Simply open the NoteBurner, click "Tools" >> "AA/AAX Converter", and then add the audiobooks to convert.
